

I understand the FCC is considering expanding LPFM stations which will take priority over FM translator service. I listen to a nationally broadcast FM station. I do hope the expansion of LPFM will not interfere with my ability to get this station which is broadcast throughout the nation. There is no other local station with the quality and type of music on K-LOVE, and many people in this community listen to, and benefit from listening to this station (88.5 in Fairbanks, AK)

THANK YOU
